Why Are The Dragons Called That?: [DID I NOT JUST EXPLAIN THIS?]

AGES:

Tribe Age: About 2,000 years.

Common Dragon Age: Most DuskWings have short lifespans, usually ages 30-50. This may be because of their DNA; a fracture of it is eagle [who knows what species].

Oldest/Youngest Dragons Living: The oldest is sweet Darkness, her age being 54. Then there is tiny Starlake, only three weeks old.

Oldest/Youngest Dragons Ever: Sometime ago, a dragon, named Nightingale, managed to clamber her way up to age 76. Another time, a dragonet hatched only five and a half months into incubation; his name was Shade.

How Long Are Dragonets In Their Eggs?: One year.
